2. Claims 23-31 are pending in this application. In the Amendment A, claims 23, 27, 28, and 31 are independent claims, claims 1-22 are cancelled, and claims 23-31 are new claims. This action is made final.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 23-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Blasio et al. (U.S. Pub. 2002/0085244 A1).

As to claim 23, Blasio teaches a scanning method, comprising:

displaying a user interface from which one or more of multiple destination devices may be selected to receive data from an input peripheral having a scanning capability (e.g., [0018], [0036], and [0042]);

the input peripheral notifying a selected destination device that the device has been selected to receive data (e.g., [0043]-[[0045]]);

Art Unit: 2179

in response to the notifying, the selected destination device requesting that the input peripheral begin transmitting data to the selected destination device (e.g., [0045]); and

in response to the requesting, the input peripheral scanning a document and transmitting data representing the document to the selected destination device (e.g., [0045]).

As to claim 24, Blasio teaches the method of claim 23, wherein the input peripheral comprises a scanner or a multifunction peripheral (e.g., [0018] and [0019]).

As to claim 25, Blasio teaches the method of Claim 23, further comprising displaying a user interface from which a resource on one or more of the multiple destination devices may be selected to receive data from the input peripheral and wherein the input peripheral scanning a document and transmitting data representing the document to the selected destination device comprises the input peripheral scanning the document and transmitting data representing the document to a resource on the selected destination device selected to receive data from the input peripheral (e.g., e.g., [0018], [0036], [0042], and [0045]).

As to claim 26, Blasio teaches the method of Claim 25, wherein the resource comprises an application program, a telephone number for a facsimile transmission of the data, an email address to send the data, or a storage location to store the data (e.g., [0020] and [0052]).

As to claim 27, Blasio teaches scanning method, comprising:

displaying a user interface from which one or more of multiple destination devices may be selected to receive data from an input peripheral having a scanning capability and from which a resource on one or more of the multiple destination devices may be selected to receive data from the input peripheral (e.g., [0018], [0036], and [0042]);

Art Unit: 2179

the input peripheral notifying a selected destination device that the device and a resource on the device have been selected to receive data (e.g., [0043]-[[0045]]);

in response to the notifying, the selected destination device acknowledging a notification from the input peripheral (e.g., [0042]-[0044]); and

in response to an acknowledgement from the selected destination device, the input peripheral scanning a document and transmitting data representing the document to a resource on the selected destination device selected to receive data from the input peripheral (e.g., [0045]).

As to claims 28-31, they are product claims of method claims 23-25, and 27. Note the rejections of claims 23-25, and 27 above respectively.
